

Ubuntu on Power, LinuxONE / z Systems

May 24, 2016

Mark Brown mark.brown@canonical.com

Lisa Pike, Director, Cloud Alliances <u>lisa.pike@canonical.com</u>

Agenda

- > Overview of Canonical/Ubuntu
- Ubuntu Differentiation
- > Ubuntu OpenStack
- Introducing Ubuntu on IBM LinuxONE
- > Questions

Canonical

We are the company behind Ubuntu.

Canonical and Ubuntu | Best of both worlds

CANONICAL

Global Professional Services

Hardware enablement & Certification

Product Development

Ubuntu

#1 Linux Desktop

#1 Cloud OS

#1 Enterprise Cloud Server

Now also for phones, tablets & IoT devices

Ubuntu Software Platforms | Introduction

Mobile Telephony - Ubuntu Phone

PC - Desktop and Laptop

Enterprise Server

Thin Client OS

Cloud Host and Guest - OpenStack

IoT - snappy Ubuntu Core

Management and services - Landscape, UA, JuJu

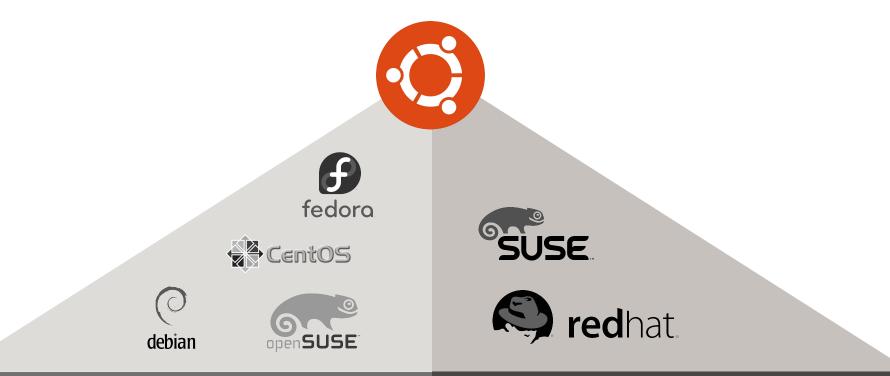

Common Ubuntu Platform

A developer friendly model

Ubuntu OS freely available but supported when you need it to be.

Free but unsupported

Supported through subscriptions

45,000 binaries built from 9,000 source projects

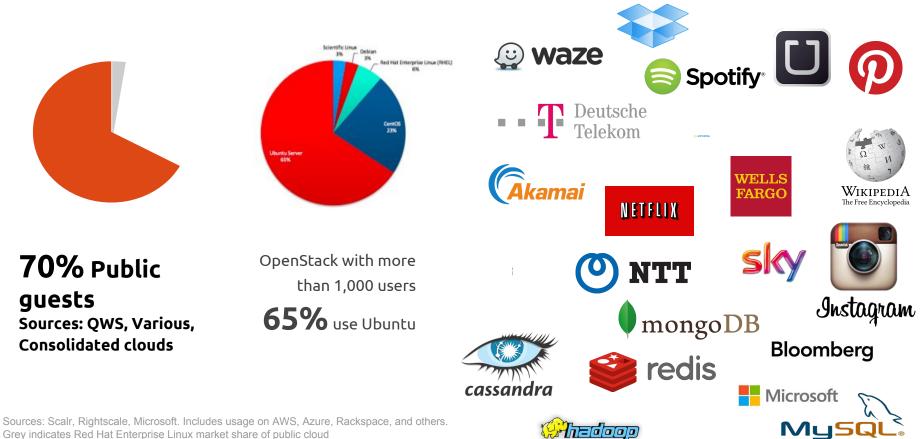

Ċ.

1500+ Workloads for developers to pick

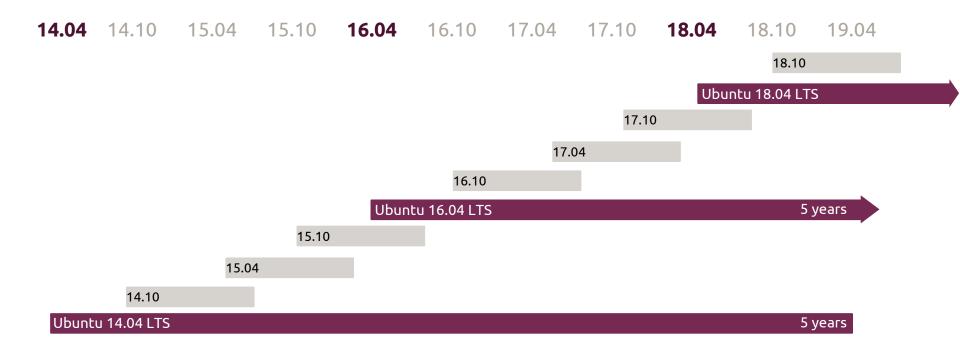

Developers choose Ubuntu for Cloud

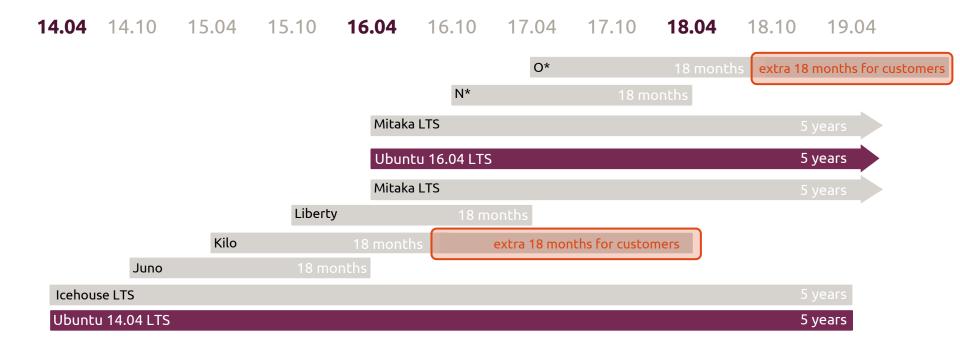

OpenStack Foundation

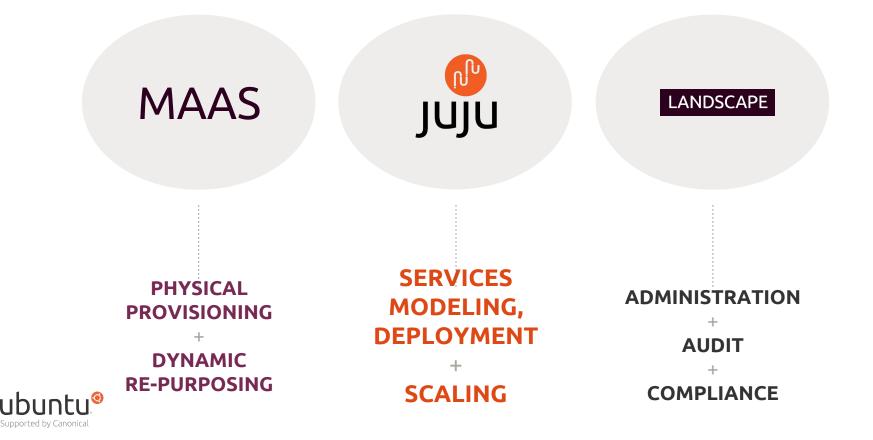

Consistent release cycle: 5 years long term support every 2 years

OpenStack Release cycle

3 complementary automation tools

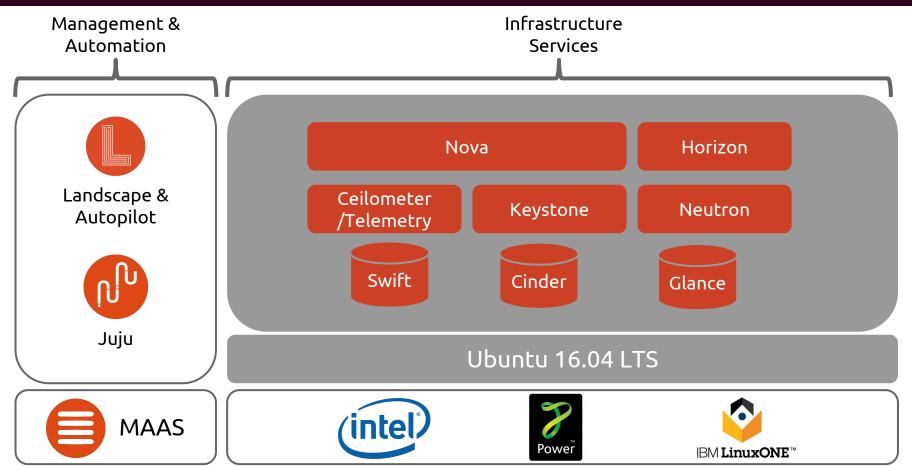

Juju: service modeling and deployment tool for cloud speed

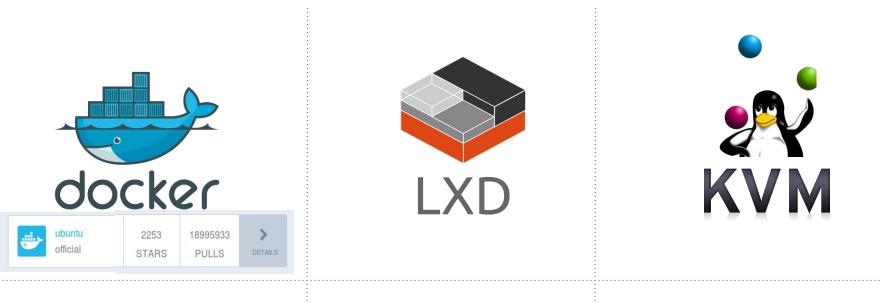

demo - url: <u>http://www.ubuntu.</u> <u>com/cloud/juju</u>

Canonical OpenStack

Ubuntu is 70% of modern scale-out ops

Application Containers

Machine Containers

Virtual Machines

LXD Features

LXD is a daemon exporting an authenticated representational state transfer application programming interface (REST API) both locally over a unix socket and over the network using https.

- Two clients for this daemon, one is an OpenStack plugin, the other a standalone command line tool.
- Secure by default (unprivileged containers, apparmor, seccomp, etc.)
- Image based workflow (no more locally built rootfs)
- Support for online snapshotting, including running state
- Live migration support
- Shell command control

Introducing Ubuntu on IBM Systems parity with x86

	POWER8			
Releases	Ubuntu 14.04 LTS, 14.10, 15.04, 15.10, 16.04 LTS	Ubuntu 16.04 LTS (APRIL 2016!)		
Environments	PowerKVM (Guest OS) PowerVM (LPAR) Host OS w/KVM (bare metal PowerNV)	Host OS w/KVM (LPAR) z/VM (Guest OS) KVM for Z (Guest OS)		
Kernel	Kernel 4.4 ppc64le	Kernel 4.4 s390x (64bit)		
Systems	812L / 822L / 812LC / 822LC	zBC12 / zEC12 / z13 / z13s / LinuxONE		
Ubuntu OpenStack	Host OS, PowerKVM	Host OS (LPAR), KVM for Z (Guest OS)		
Packages Available	Ubuntu Server Main and Universe (All the supported packages) approx. ~41000	Ubuntu Server Main and Universe (All the supported packages) approx. ~41000		
Tools	Juju / Landscape / Autopilot	Juju / Landscape / Autopilot		
Support	from Canonical or IBM (Canonical for L3)	from Canonical		

Preview: IBM Interconnect Demo

GA'd: April 21, 2016

Announcing: LinuxONE, z Systems with Ubuntu

Value Prop

- Ubuntu brings LinuxONE to the Cloud with Massive Scalability and Performance in the frame and Elastic Pricing
 - Developer ecosystem with access to modern dev/ops
 - Containers with LXD, Docker
 - Juju for modern modelling and hybrid operations
 - Strong economics fixed support pricing to enable scalable usage of Ubuntu
 - Very disruptive pricing <u>See here</u>

LinuxONE Open Beta

- Ran from March 24th to April 20th
- Hundreds of downloads

IBM LinuxONE community cloud for developers: Coming soon!

OSS Package Readiness on z Ubuntu

Currently Supported Work In Work in progress (targeting 2Q2016)

Work In Progress (Targeting 2H2016)

Languages and Dev Environment	Databases	Config/Monitoring/ Management	App Development & DevOps	Web Application Dev/Perf & CMS
Node.js	Apache CouchDB	Ansible	ANTLR	Apache HTTP
Erlang	MySQL	Apache ZooKeeper	Apache Maven	Apache Tomcat
gccgo, Golang	MariaDB	cAdvisor	Doxygen	Ceilometer client
oCaml	MongoDB	virt-install	Protobuf	Drupal
Rails	Apache Cassandra	Chef	Snappy-java	HAProxy
Ruby	Apache Geode	Puppet	Xerces-C	WordPress
R	PostgreSQL	etcd	XMLSec	Apache jMeter
Scala	Redis	Consul	Apigility	Joomla
	MongoDB Drivers		Jenkins	Magento
			Wildfly	NGINX
Container Management	Messaging & Streaming	Big Data & Analytics		SugarCRM
Docker	Logstash (ELK)	Apache Spark	laaS & PaaS	Front End
Docker Compose	RabbitMQ	Elasticsearch	Juju	Kibana
Docker Swarm	Apache Kafka	Apache Solr	OpenStack (2Q)	
Docker Distribution	Fluentd		Cloud Foundary (3Q)	
Kubernetes				

IBM Software on z Ubuntu

Initial focus is on Big Data, Analytics, and Middleware

- Java target 16.04
- xIC target 16.04

Available in Ubuntu 16.04 Planned for post 16.04

- Liberty Archive Install target April 2016
 - WebSphere Application Server target 2H 2016
 - WebSphere MQ target 2H 2016
- DB2 LUW target 2H2016

More Middleware, Big Data and Analytics products are on the horizon

IBM Ubuntu Support Line Offering

IBM Linux Support Line front ends Canonical Ubuntu Advantage support package:

- •Level 1 and 2 support from IBM TSS, Level 3 delivered from Canonical
- •Incudes support for Ubuntu OS, Ubuntu OpenStack, Juju, MAAS, Landscape
- •Per server pricing; not per socket

•For order quantities greater than 25 Canonical will include Landscape Dedicated Server

What's included?	1 or 3 year options	Ubuntu Advantage Server	Ubuntu Advantage Cloud	Delivered By:
Level 1 & Level 2 Support	9x5 or 24x7 support options via IBM Support Line	0	0	IBM's Linux Support Team
Level 3 Support	Available 24x7 to IBM support (based on problem severity), via Ubuntu Advantage	0	0	Canonical to IBM (on behalf of Canonical entitled customers)
Landscape systems management	Landscape Dedicated Server, via Ubuntu Advantage	0	0	Canonical to entitled customers
Legal assurance	Ubuntu Assurance program, via Ubuntu Advantage	0	0	Canonical to entitled customers
Knowledge and support	Knowledge base, via Ubuntu Advantage	5	0	Canonical to entitled customers

Ubuntu Advantage Offering also offered by Canonical: <u>http://www.ubuntu.com/download/server/power8</u>

Simple Per Drawer Pricing

Pricing for Ubuntu Advantage is based on the number of Drawers, Regardless of the number of IFLs or Model

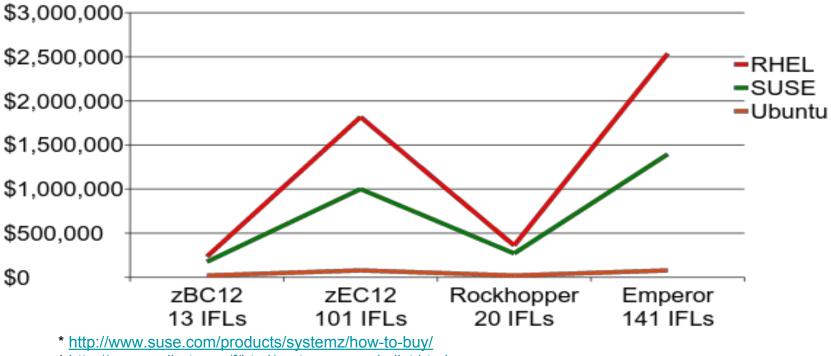

Model	Drawers	Cores/IFLs	1 Year	3 Years
zBC12	1	Up to 13	\$19,500	\$58,500
zEC13	1	Up to 20	\$19,500	\$58,500
	2	Up to 43	\$39,000	\$117,000
	3	Up to 66	\$58,500	\$175,500
	4	Up to 101	\$78,000	\$234,000
LinuxONE Rockhopper	1	Up to 20	\$19,500	\$58,500
LinuxONE Emperor	1	Up to 30	\$19,500	\$58,500
	2	Up to 63	\$39,000	\$117,000
	3	Up to 96	\$58,500	\$175,500
	4	Up to 141	\$78,000	\$234,000

Pricing is in USD
